Playing the game:

Your escape from Castle Wolfenstein starts in the lowest level of the castle. You will always start in the same castle until you escape from it or generate a new one and you will always start with a gun and ten bullets.

Each room in the castle has at least one doorway that leads to an adjoining room or a stairway that leads to another level of the castle.

As you roam from room to room, trying to find the chest that contains the war plans and the doorway to freedom, you will have to shoot your way past guards and SS stormtroopers. You can replenish your supply of bullets and acquire other supplies by searching guards and opening supply chests.

If you search a dead or surrendered guard and find some items that you need, they will automatically be transferred to your supply. However, bullets will be transferred only if the guard's clip contains more bullets than your clip.

You will need to move quickly, so you will be limited to a maximum of 10 bullets, 3 grenades, keys, a bulletproof vest, a uniform and the war plans for Operation Rheingold.
